Risk Solutions International Names Michael Corby

Risk Management and IT Security Pioneer Joins RSI as Vice President of Business Continuity and Disaster Recovery

Risk Solutions International today announced the addition of Michael J. Corby to its team of expert Risk and Business Continuity professionals, where he will focus on Business Continuity, Disaster Recovery and Data Privacy and Security issues and opportunities.

"Risk Solutions International has a compelling portfolio of Business Continuity and Emergency Response services for both private and public sector organizations," Corby said. "I'm delighted to be part of this team, and will begin immediately to broaden and deepen our capacity to provide practical, functional guidance in responding to increasingly complex operational risk management issues domestically and overseas."

Mr. Corby is a seasoned operational continuity and information security executive, experienced in creating and working with highly secured data center facilities. During his many years as a CIO and consulting executive, Mike has directed projects for a host of federal and state level government and private sector organizations, and critical infrastructure sectors.

With complementary skills in business continuity planning, information security and IT disaster recovery, he adds tremendous subject matter expertise to RSI's team, and a sophisticated new capability in addressing clients' complex information and data-driven continuity and recovery challenges.

"Risk Solutions International is excited that Mike Corby has joined our growing team of operational risk professionals," said Duane Lohn, RSI executive vice president. "He adds significant expertise to our organization in key areas of risk facing our clients, such as resiliency of operations, IT disaster recovery, and information and data protection."

Mr. Corby collaborated in 1985 with industry groups to create the organization that developed and administers the Certified Information Systems Security Professional ("CISSP") Credential. With additional credentials as a Project Management Professional ("PMP") and Certified Computing Professional ("CCP"), he was named the first recipient of the Computer Security Institute's Lifetime Achievement Award. Mr. Corby is a world recognized thought leader, speaker and author, and is presently writing a book on Data Loss Prevention.

"Mike adds a very sophisticated dimension to RSI's consulting portfolio with his ability to integrate business continuity and disaster recovery with data privacy and security threat elements," added Scott Corzine, RSI senior vice president. "As our engagements become more complex and global in nature, this subject matter expertise enables RSI to offer unique operational risk services found in few other firms."
