Invizeon and AT&T to host Mission Critical Communications Seminar in Washington D.C.

Invizeon Corporation and AT&T Government Solutions will host a gathering of the nation's leading minds in homeland security and emergency communication in Washington D.C. September 15, 2005. Representatives from Federal Agencies such as DHS and DoD will join industry leaders at the AT&T Innovation Center for the latest news and technology in emergency communications.

Topics covered during the seminar will include: Continuity of Government (COG), Continuity of Operations (COOP), new and emerging standards, NIMS and the National Response Plan, Critical Infrastructure protections, next generation alert and notification systems, Federal Enterprise Architecture, Interagency and cross-agency communication and collaboration.

U.S. Senator Conrad Burns (R-Montana) will deliver the opening address and keynote speaker Dan Bart will address the critical importance of emergency communications from the homeland security perspective. Mr. Bart is well suited for this role, serving as co-chair of the American National Standards Institute (ANSI) Homeland Security Standards Panel and Senior Vice President of Standards and Special Projects Telecommunications Industry Association (TIA). Attendees will also hear case studies on the U.S. Navy's use of the emergency notification system, CHAIN EMN.

The final speaker will be John Copenhaver, who will deliver a presentation entitled, "The Critical Role of Communication in Emergency Preparedness, Response and COG." Mr. Copenhaver is the President and Chief Executive Officer of Disaster Recovery Institute International, Executive Vice President of Risk Solutions International, LLC and President of the Board of the Global Partnership for Preparedness. He was appointed as Director of the Federal Emergency Management Agency (FEMA) Region IV, where he served four years directing the nation's largest natural disaster recovery.

Invizeon Corporation along with AT&T Government Solutions and AT&T Labs will give a live demonstration of CHAIN EMN simulating a major homeland security emergency as well as demonstrate the day-to-day effectiveness of COG and COOP plans among federal agencies. This will be followed by an in depth overview of the innovative technology behind this market leading solution. Specific focus will be how CHAIN EMN can be a key component of every Federal and DoD agencies', COG, COOP and

communication system plans while complying with Federal Enterprise Architecture standards that AT&T helped to develop.
