

## **BlueFinn GRC & Risk Solutions International join forces in strategic partnership to augment Resiliency in North America and the Middle East**

BlueFinn GRC is delighted to announce its strategic partnership with Risk Solutions International (RSI), a highly regarded provider of Risk Consultancies in North America. The partnership represents a major accomplishment in opening new doors for both companies and their clients.

The joint venture is designed to leverage the respective strengths and expertise of both companies, with a focus on Risk management solutions and advisories. The goal is to provide cutting-edge solutions and improve the overall customer experience through expanded product offerings, global reach, and enhanced operational capabilities.

BlueFinn GRC's Resilience platform, which offers a variety of modules for GRC services, that include Enterprise Risk Management, Internal Audit, Cyber Security GRC, Third-Party Risk Management, Compliance & Cloud Security Assessment Framework; has formed an ideal partnership with Risk International Solution's Risk Consultancy services. With both companies sharing research and development efforts, they will be able to drive innovation and introduce groundbreaking solutions to meet evolving customer needs in the North American & Middle Eastern region.

BlueFinn's low-code/no-code platform makes it extremely customizable to the requirements of its customers; combined with RSI's consultancy prowess in the resiliency domain, the collaboration between the two companies is expected to foster a collaborative environment for growth and success.

We are thrilled about our partnership with RSI. This collaboration presents a significant chance to provide our customers with comprehensive risk solutions and access new markets. Through the merger of our strengths and decades of experience in multiple industries, we are well-positioned for impressive growth and success in the future. Aisha Khan, Managing Partner at BlueFinn, shares this sentiment, stating, "Our partnership will drive innovation and value to our customers, and we are eager to explore the opportunities this collaboration will bring."

"RSI is excited to work and engage with BlueFinn GRC on important matters such compliance governance, risk, resiliency, and ERM" says Duane Lohn, Senior Managing Director of RSI. "We are already working together on several clients in the Middle East Region and this agreement will allow us to expand our footprint together added Corey Gooch, Managing Director RSI.

**About BlueFinn:**

BlueFinn GRC is comprehensive platform for organizations to manage and mitigate potential risks and ensure compliance with relevant regulations and laws. It is an enterprise software that provides a centralized and integrated platform to manage the various aspects of governance, risk, and compliance. BlueFinn prioritizes potential risks, tracks and report incidents that may affect the organization's compliance or reputation, as well as generate reports for internal and external auditors, and regulatory bodies. The software can be used across various industries and sectors such as financial services, healthcare, government, and more. For more info visit [bluefinngrc.com](http://bluefinngrc.com)

**About RSI:**

RSI is an independent provider of solutions to operational risks that organizations face, with expertise in risk management, IT and information security, data privacy, and consulting. They work across the United States and globally, helping commercial, educational, and governmental entities respond to risks in an unpredictable environment. Their key business themes include enterprise risk management, cybersecurity risk management, and business continuity planning. For more information visit [rsi-llc.com](http://rsi-llc.com).
